FIRST® Robotics Competition

# Watertown High School Black Magic Robotics Team 237

## Who Are We?

Watertown High School's FIRST Robotics Team is a team made up of volunteers that teach real life skills to high school students. Students that join the team are taught critical thinking, metalworking, woodworking, presentation skills, teamwork, problem solving, 3D modeling and much more.

## What Do We Do?

Students are taught using a robot that is designed to compete in the FIRST Robotics Competition. Every year our team is given the same rules and instructions to build a robot to compete against 500+ other teams at competitions that take place around the world. Volunteers teach the students how to not only design, build and compete with a robot, but also teamwork and public speaking. Students that participate in FIRST Robotics also have access to apply for over \$20 Million in scholarships that are provided exclusively to FIRST Robotics students applying to technical and non-technical schools.
